Thermodynamics 7th Edition
Solutions Manual

In thermodynamics, work performed by a system is energy transferred by the system to its surroundings, by a mechanism through which the system can spontaneously exert macroscopic forces on its surroundings. In the surroundings, through suitable passive linkages, the work can lift a weight, for example. Energy can also transfer from the surroundings to the system; in a sign convention used in ...

Types of Impellers in Centrifugal Pumps.

Impeller design is the most significant factor for determining

performance of a centrifugal pump. A

properly designed impeller optimizes flow while minimizing

turbulence and maximizing efficiency..

The impeller of a centrifugal pump can be of three basic types:.

Open impeller. Open impellers have the vanes free on both sides.
